SUMMARY

Cybersecurity professional with hands-on experience in penetration testing, vulnerability assessment, and secure coding. Skilled in Nmap, Burp Suite, Metasploit, Wireshark, and Python scripting. Practical exposure to network security, firewalls, incident handling, and Purple Teaming through internships and CTF participation. Certified in ISC2 Certified in Cybersecurity (CC), with a strong focus on validating fundamentals, performing VAPT engagements, and enhancing organizational defenses. Continuously learning and applying skills to stay ahead in the evolving cybersecurity landscape.

SKILLS

- **Technical Skills:** VAPT, KQL, Python, HTML, Security Documentation
- **Security Tools:** Microsoft Sentinel, Burp Suite, Nmap, Nessus, Wireshark, Metasploit
- **Platforms/DevOps:** Git, GitHub, Visual Studio
- **Soft Skills:** Problem Solving, Teamwork, Communication, Critical Thinking

WORK EXPERIENCE

Attosol - SOC Analyst L1

Dec/2025 - Present

- Monitored and investigated security alerts using Microsoft Sentinel (SIEM) to detect and respond to potential threats.
- Performed alert triage, validation, and initial incident analysis to reduce false positives and improve detection accuracy.
- Analyzed security incidents by correlating logs, identifying attack patterns, reviewing user behavior anomalies, and validating threat indicators (IOCs).
- Documented incidents with clear, client-ready reports including attack summary, IOCs, and recommended remediation steps.

IndustechSolutions - Malware analyst Intern

Oct/2025 - Nov/2025

- Studied how malware is developed, obfuscated, and hidden to evade detection.
- Built controlled lab-based malware simulations to understand persistence mechanisms, DLL usage, and execution flow.
- Analyzed persistence methods, DLL injection concepts, and C2-style connections from a defensive perspective.
- Documented technical observations and security implications for defensive understanding.

Supraja Technologies - Cybersecurity Intern

May/2025 - Aug/2025

- Participating in hands-on cybersecurity training sessions and lab simulations.
- Gaining experience in vulnerability scanning, network analysis, and secure coding practices.
- Working with tools like Nmap, Wireshark, and custom scripts to understand attack vectors and defenses.
- Contributed to developing an automated vulnerability scanner to explore real-world scanner capabilities and limitations.

EDUCATION

Guru Nanak Institutions Technical Campus

Bachelor's Degree in Computer Science and Engineering (Specialization in Cybersecurity)

2021 – 2025

Sri Gayatri Junior College

Higher Secondary Education – MPC (Maths, Physics, Chemistry)

2019 – 2021

PROJECTS

Cipherus – Secure File Encryption Tool

- Developed a Python-based encryption tool using Fernet (AES) and SHA-256 for data integrity.
- Designed secure workflows for key generation, storage, encryption/decryption, and tamper detection with a user-friendly command-line interface.
- Embedded custom markers and hash validation to prevent double encryption and detect tampering.
- Gained hands-on experience in cryptographic principles, secure key management, and real-world data protection challenges.

AI Assistant – Fully Offline AI Assistant

- Built a Python AI voice assistant integrating OpenHermes, Whisper, and local speech processing for offline privacy.
- Implemented hotword detection, speech-to-text, noise reduction, intelligent responses, and secure task execution.
- Enabled features like time/date queries, web access, continuous voice listening, and secure local model integration.

AWVS – Advanced Web Vulnerability Scanner

- Developed a Python-based automated vulnerability scanner with backend modules for web crawling, injection, and vulnerability assessment.
- Integrated tools like SQLMap and OWASP ZAP using custom Python wrappers to automate security scans.
- Gained deep insights into real-world scanner limitations and web application security challenges.
- Coordinated the team's development tasks and ensured successful project delivery.

ACHIEVEMENTS & EXTRACURRICULARS

- **Student Placement Coordinator** – Coordinated drives for 1000+ students and improved placement communication.
- **Hacktopia Event organization** – Spearheaded a national cybersecurity event with strategic outreach and engagement.
- **GDSC-GNI Social Media Core** – Managed digital outreach for various workshops and events like "Decrypting Problems using Python".

CERTIFICATIONS

Professional

- ISC² Certified in Cybersecurity (CC) – 2025
- Certified Security Expert Level-1 – Supraja Technologies

Courses & Training

- Ethical Hacking with Kali Linux – Udemy (2024)
- Microsoft Student SOC Program Foundations – 2025

Virtual Internships & Simulations

- Cybersecurity Virtual Internship – Palo Alto Networks (2024)
- Cybersecurity Job Simulation – Mastercard (Forge)
- Cybersecurity Job Simulation – Deloitte (Forge)
- Cybersecurity Job Simulation – AIG Shields Up (Forge)
- Salesforce Developer Virtual Internship (2024)
